ABOUT

Final-year BS Software Engineering student with hands-on experience building scalable multi-platform applications. Skilled in AI integration (face recognition), backend development (FastAPI, ASP.NET), mobile/desktop apps (React Native, C#), and full-stack systems

EDUCATION

Bachelor of Science in Software Engineering (BSSE) Arid Agriculture University Rawalpindi 2022 – 2026
(Expected)

SKILLS

- Languages: C#, Java, Python, C++
- Mobile & Frontend: React Native, HTML/CSS, Android(Intermediate)
- Backend: FastAPI, ASP.NET

PROJECTS

Geo Photo Tagging System – Final Year Project AI-Powered Multi-Platform Photo Management System (Mobile + Desktop + Web)

- Developed face recognition and automatic person tagging using DeepFace AI.
- Built intelligent metadata engine for location, event, date, and person-based tagging.
- Implemented real-time synchronization between React Native mobile and C# Windows desktop apps.
- Added advanced image processing including duplicate detection and smart clustering with FastAPI backend. Tech: FastAPI, DeepFace, React Native, C#, Python

Medical Store Management System C# Desktop Pharmacy Management Application

- Designed real-time inventory system with expiry alerts and low-stock notifications.
- Developed automated billing and invoicing module with dynamic pricing.
- Created user-friendly Windows Forms interface for medicines, customers, and suppliers. Tech: C#, Windows Forms, SQL Server, ADO.NET

Blood Donation Management System Java-based Blood Bank Platform

- Engineered donor eligibility validation and FIFO queue-based request handling.
- Implemented Binary Search Tree for efficient donation record retrieval.
- Built multi-bank real-time blood inventory tracking using MySQL. Tech: Java, MySQL, DSA (BST/Queues), JDBC

Cash & Carry Inventory System Java Retail Management System

- Developed efficient stock tracking, FIFO customer processing, and automated billing module. Tech: Java, SQL, JDBC
